

JENGA

Source: wikihow

Before You Play

Set up the tower. First, shake the Jenga blocks out onto a flat surface. Then, stack the blocks in sets of three. Each new layer of three parallel blocks should be rotated 90° along the horizontal axis from the last layer.

Straighten out the tower. Before you play, make sure that the structure is sturdy.

Playing the Game

Remember: you can only touch the tower with one hand a time.

1. Pick a person to pull the **first block**.
2. Carefully remove a block.
3. **SAY** an answer to the question on the **prompt card (by colour or number)**. **AND WRITE DOWN** your answer as well – **no repeats!**

Note: You CANNOT REPEAT AN ANSWER and your group CAN CHALLENGE YOU on this if you say the same thing over and over. If you persist – you will not play.

4. **After answering place each pulled block atop the tower** to continue the pattern of layering-by-threes.

Play until the tower falls. The "loser" of the game is the person who makes the tower topple. Rebuild the tower to play again!
